

From our Formulary **Light Sprayable Lotion**

This lotion is thin enough to be sprayed from a mister and it stays well emulsified. You can substitute **Lotioncrafter FCO** (Caprylic/Capric Triglyceride) or Mineral Oil for the Squalane. Do not substitute fixed oils for the Squalane as they will be too heavy. You can substitute any other water soluble active or amino acid (like silk) for the Hydrolyzed Oats, or just use water in its place. Hydrosols can also be used in place of some or all of the water. Have fun!

1. Heat Phase A ingredients to 176°F. Cover and hold at this temperature for 20 minutes.
2. Heat Phase B ingredients to 176°F.
3. Add Phase A to Phase B and stick blend until cool, placing pot in cool water to speed cooling process. Keep stick blender well submerged in pot to avoid excess incorporation of air into formulation while mixing.
4. Pour into bottles.
