Scential Notions™ Massage Oil

Lotioncrafter IPM added to this massage oil blend lets the oils sink into the skin, leaving no greasy feeling. Oil drag and buildup on the massage therapist's hands is all but eliminated. Less oil is needed for the massage, but "play time" (the amount of time the therapist has to massage a given area before more oil is needed) is improved. While the Vitamin E is a nice addition for the skin, its primary purpose in the first formulation is to retard the oxidation of the oils.
