Silky Dry Oil Perfume Spray

Perfumed Body Sprays are as simple as can be when you're working with cyclomethicone! **Lotioncrafter LC995 Cyclomethicone** can be used alone with just the addition of some fragrance. Remember, though, cyclomethicone evaporates completely, leaving nothing behind. It can almost feel drying. However, if you add a bit of **Lotioncrafter LC1684 Cyclomethicone (and) Dimethicone** or **Lotioncrafter DM350 Dimethicone** to them, they leave the skin with a silky dry-down that is not greasy, but luxurious. Note that pumps can vary in their ability to properly mist some formulations. Adjust the level of LC1401DC down in the following formulation if this proves to be a problem for your pump assembly.

Formula

	Percent	Grams	Ounces	Ingredient
Phase A	97	485	16.17	Lotioncrafter LC995 Cyclomethicone
	1	5	0.17	Lotioncrafter LC1684 Cyclomethicone (and) Dimethicone or Lotioncrafter DM350 Dimethicone
Phase B	2	10	0.34	Fragrance

1. Mix Phase A ingredients together.
2. Add Phase B to Phase A and stir to mix.

Makes 500 grams (16.68 ounces)

Ingredients in **bold** are carried by Lotioncrafter.
