Polysorbate 20

INCI: Polysorbate 20

DEFINITION

Polysorbate 20 is a vegetable source mixture of laurate esters of sorbitol and sorbitol anhydrides, consisting predominantly of the monoester, condensed with approximately 20 moles of ethylene oxide.

DESCRIPTION

Polysorbate 20 is used as a high HLB emulsifier in combination with a variety low HLB emulsifiers to cover a wide range of oil in water, and water in oil emulsion systems. Alone, it is an excellent solubilizer of essential oils, a wetting agent, viscosity modifier, stabilizer and dispersing agent. Use it in the creation of linen and room sprays, body sprays and other products where oils need to be solubilized in water.

TYPICAL PROPERTIES

Physical Form @25°C	Liquid
HLB	16.7
Solubility	Water
CAS Number	900-64-5

SPECIFICATIONS

Color	3
Water, %	3.0 Max.
Saponification Value	40 - 50
Hydroxyl Value	96 - 108

STORAGE

Store in a dry place in a tightly closed container. When properly stored, this product has minimum usable life of 18 months from the date of production.
